### DETAILED ACTION

**1. Restriction is required under 35 U.S.C. 121 and 372.**

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- ◆ Group I, claim(s) 1-15, drawn to an immunoassay to detect alpha-amylase.
- ◆ Group II, claim(s) 16-18 and 20-22, drawn to a monoclonal and kit therefore.
- ◆ Group III, claim(s) 19, drawn to a monoclonal antibody that binds to conformation epitope on alpha amylase comprising all of the amino acid sequences 1-3.

**2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the assay of group I does not require the monoclonal antibodies of groups II and III and the monoclonal antibodies of Groups II and III are not related since the antibody of Group II is required to bind only one amino acid sequence, and the antibody of Group III is required to bind all three sequences.**

**3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).**
